My teacher explained it by saying that 4 is also 0 for the same reason 1/2 is 0. I guess he was just telling me to remember that. But that doesn't really make sense. Why is 4 0? How does 1/2 =0? A: $4=0\times1+1\times1+0\times1+0\times1+1$ imes2+0\times4\$ That is, it can be represented as a sum of four equal amounts. Similarly, \$1/2=0\times\frac12+0 \times\frac12+0\times\frac12+0\times\frac 12\$ That is, it can be represented as a sum of four equal amounts. It is a pattern. If a number can be represented as a sum of four equal amounts, then we can say that it is equal to \$0\$. A: The word "equal" is used in two ways. In the additive sense, you are saying \$1/2\$ is an amount of the form \$x\times 1+ y\times 2\$ where \$x\$ and \$y\$ are rational numbers. In the multiplicative

sense, you are saying that \$1/2\$ is an amount of the form \$a \times \frac12 + b \times \frac12\$ where \$a\$ and \$b\$ are rational numbers. \$1/2\$ in the additive sense is not equal to \$0\$. You might have been taught that \$\frac 12 = 0\$ is a rational number. But in the additive sense, \$\frac12\$ is not equal to \$0\$. \$\frac 12 = \frac12 + \frac12\$. \$1/2\$ in the multiplicative sense is equal to \$0\$ for the same reason \$3/2\$ is equal to \$0\$. \$\frac 32\$ is not. \$\frac 32 = \frac 32 + \frac 32\$. Pros: All the Occ13bf012

4 Best Products for 2015 - 2018 Fast Way to Download Full Mac iOS Apps in Mac 2018. By Tom Barron. In. I make the speech speech synthesizer work, the way I want it work..
