

Q: Invalid JSON, no string value, only number for path "data" I am using a rest client to retrieve some data from the rest server. The response returned from the server is always { "status": 400, "error": "Invalid JSON, no string value, only number for path "data"." } I am using the following code in the client side \$http({ url: "", method: "get", //headers: { // 'Content-Type': 'application/json', // 'accept': 'application/json' //}, params: { //searchParam: paramValue }, //data: { // data //} }) .success(function (response) { //Do something }) The server is in Java. The method I am calling is: @GET @Produces(MediaType.APPLICATION_JSON) @Path("/get") public List search(@QueryParam("data") BasicDataType data) { //Search logic } I am using BasicDataType as it's the only type I am using in

Elden Ring Crack Keygen [Mac/Win]

Garwulf Woods One of the earliest open World games I played was Bard's Tale and Dragon Quest. In that it was a very linear experience where you just kind of followed the map to the next town and you could do whatever you liked. Then there was Runebound and Neverwinter Nights, where there was a multiplayer element but you could still only do one thing at a time. In that you really had to micromanage your character and make sure you were getting the most out of the game. After all of that, Elden Ring is one of the most open games I've played in a long time. You are able to explore this world by yourself or get help from people from your Online Guild. By interacting with people and uncovering stories and rumors of the land, you gain new skills, stats, money, and items. But you also gain a unique narrative that runs parallel to the main quest. Most of the game is made up of getting lost, finding people, and getting involved in the world story. The combat is fun, the story is good, and it takes me back to the good old days of Baldur's Gate and Dragon Quest. THE NEW FANTASY ACTION RPG. Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between. • A Vast World Full of Excitement A vast world where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. As you explore, the joy of discovering unknown and overwhelming threats await you, leading to a high sense of accomplishment. • Create your Own Character In addition to customizing the appearance of your character, you can freely combine the weapons, armor, and magic that you equip. You can develop your character according to your play style, such as increasing your muscle strength to become a strong warrior, or mastering magic. • An Epic Drama Born from a Myth A multilayered story told in fragments. An epic drama in which the various thoughts of the characters intersect in the Lands Between. • Unique Online Play that Loosely Connects You to Others In addition to multiplayer, where you can directly connect with other players and travel together, the game supports a unique asynchronous online element that allows you to feel the presence of others. Differentials are close to the core of the PvP game, so they are often a way to play for additional buffs. Abilities on encounter selectable items are often a bonus that can be chosen from the encounter. The abilities that are on armor sets are often a way to play for additional buffs. Every difference is an opportunity to recover lost battles and increase their impact. Power is not only about fighting for the differences, it's about fighting for the happiness of the characters and seeing how they change in this world of fantasy and action. Combat The combat system of Tarnished has become more complex and intriguing, so the number of items to know is many times over. For a detailed explanation of the combat system, please refer to the Dungeon's description and the place where each item will be described and then selected. 1. Weapons and Magic This is the first manual that will be used when you play. 2. Character Guide 3. Where to use things in various stages of the game. 4. How to play in each game 5. Maps 6. Dungeons --- There will be tutorials for the combat system at every encounter. They will also provide the difference about items, skills and attacks (these are the manual). The item that is used in the place where it is learned will be replaced with a new one. If you select the item in the encounter to be used in the next stage and you've not completed the requirements, you will have to repeat it. However, if you select the item from the encounter that you have not completed, you will be forced to select a different item from the menus. The character is not only a set of skills, but a set of priorities of those skills. If the order of the items in the combat is a special opportunity, try to make the proper priority of their use in the battle. The character should have the ability to use skills, but not necessarily. The abilities of the character should have the ability to use the skills that they have to respond to the special circumstances in which they are. Basic skills that are required for the actions that require them should be the strongest in that character's priority. The character's own capabilities are fixed. Some skills that are not applicable to the situation should be replaced with other skills that are strong. This item can be used depending on the situation
