Moreover, many people may want to know is why SysWin.exe is so devastating to your system. Well, the infection can slow down and even malfunction your machine in a number of ways and while the virus has an extremely simple appearance and it has been created specifically to prove to people like you that this virus isn't even harmful, it can cause a lot of trouble. If you have never encountered a virus that has been branded as SysWin.exe, then know that it is a Windows Trojan, which is written with the intention of camouflaging the fact that it is a malicious piece of software. If you delete the virus, you will not have the ability to get rid of it unless you use special, specialized malware removal programs.
