In the Elements 14 update, the new High Dynamic Range viewing mode aims to produce more realistic looking images by capturing more dynamic range. It also includes an ability to create an unlimited number of curve layers, grouped data, and enhanced channel tools. A Lens Blur filter greatly increases the quality of photos taken using modified lenses. Raster graphics are not always the best solution for working with vector-based graphics. In the previous update, Elements contained the ability to fill shape layers but that was removed in the latest version. In the previous update, the user could let Photoshop know that they had the latest version of Photoshop installed and Photoshop Elements could open the latest version of Photoshop. This will no longer happen, however, making it harder for people to update. Work with multiple people on a common project, instead of only working with one version.
